

Large Cap Quarterly Commentary

2020: Third Quarter

Argent

Performance Summary

For the third quarter of 2020, the Argent Large Cap strategy outperformed its benchmark, returning 10.91% net of fees, compared to a return of 8.93% for the S&P 500® Index.

Performance Summary as of September 30, 2020

	%	3Q20	YTD	1 Year	3 Year*	5 Year*	10 Year*	15 Year*	20 Year*	Since Inception*
Argent Large	Gross	11.01	4.99	16.60	10.98	12.88	13.92	9.82	7.58	9.22
Cap Growth	Net	10.91	4.70	16.17	10.54	12.41	13.41	9.27	6.99	8.63
S&P 500		8.93	5.57	15.15	12.28	14.15	13.74	9.19	6.42	7.61

* Annualized

For comparison purposes, the strategy is measured against the S&P 500 ® Index. Past performance is no guarantee of future results. Data is as of 09/30/20 and is supplied as supplemental information to the composite disclosures presented later in this document.

In the third quarter the Argent Large Cap strategy outperformed the S&P 500 Index. Both stock selection and allocation contributed to performance. On a sector basis, Consumer Discretionary was the largest contributor for the quarter, followed by Energy, where the Large Cap strategy had no exposure and by Information Technology, driven primarily by stock selection. Detracting sectors included the Consumer Staples and Health Care sectors.

Both allocation and stock selection were positives for Consumer Discretionary. Leading performance on a stock basis was D.R. Horton, Inc. Low interest rates, combined with considerable stimulus from the government have increased home affordability, especially for first-time home buyers, the target market for the company. Target Corporation also contributed to performance. Target continues to narrow the gap between bricks and mortar retail and online. The company posted an eye-popping 24% increase in same-store-sales for the quarter. These results were buoyed by a nearly 200% increase in the company's e-commerce business. A key part of Target's success has been its ability to offer same-day options (pick up in store/drive up/Shipt) to consumers. These distribution channels exhibited a 300% increase during the quarter. The results validated Target's omnichannel approach and reinforced the company's status as a leader in retail.

As mentioned, a lack of exposure to Energy was a contributor to Large Cap's outperformance. The Energy sector remains volatile, and lower prices for crude oil are forcing North American producers to slash production budgets. In addition, unpredictable actions by OPEC+ has increased volatility in the sector.

Information Technology performance was led by stock selection. Mastercard Incorporated, a long-held position for Large Cap, contributed the most to performance. Plastic and electronic payment continues to take share across the world, driving revenue growth for Mastercard. Skyworks Solutions, Inc. also contributed to performance in the quarter. Skyworks is one of three large radio frequency (RF) chip companies expected to benefit from the roll-out of 5G for wireless telecommunications.

Stock selection was the primary driver for negative performance in Consumer Staples. Large Cap's holding of Post Holdings, Inc. drove the underperformance. Although Post's cereal business is doing well, 30% of the company's revenues are derived from food service. With many restaurants closed, Post's food service segment has been impacted. Post has a history of realizing value with its different businesses. We believe that value add will continue over time.

Allocation was the primary detractor in the Health Care sector, as the Argent Large Cap strategy has an overweight relative to the benchmark. Danaher Corporation contributed to performance. The company's diagnostic businesses are benefiting from COVID-19. Detracting from performance was Centene Corporation. Increased discussion and uncertainty related to the elimination of the Affordable Care Act (ACA) is putting pressure on Centene. AbbVie,

Large Cap Quarterly Commentary

2020: Third Quarter

Argent

Inc. and Incyte Corporation also detracted from performance. Pharmaceutical and biotech companies in general showed weakness during the quarter.

Market Commentary

Despite a tumultuous September, stocks ended the third quarter with solid gains. Uncertainty still remains around COVID-19, future economic stimulus and the presidential election, yet markets continue the recovery that began in early April. Several tailwinds such as past economic stimulus, the Federal Reserve's zero interest rate policy and the promise of another federal relief package has kept the expectations of investors high. As the calendar turned to October, the U.S. Presidential election moved front and center on investors' minds.

Top Contributors

D.R. Horton, Inc. is a home builder headquartered in Arlington, Texas. The company is one of the largest homebuilders in the United States. The company operates three separately branded divisions: Express Homes for entry-level buyers, Emerald Homes for the luxury buyer and Freedom Homes which cater to an adult community aged 55 and over. Robust stimulus both from the Federal Reserve and Federal government has driven down interest rates, making homeownership more attractive. In addition, the stimulus programs have put money into the pockets of Americans making the starter home, which is D.R. Horton's focus, more affordable.

Target Corporation is the second-largest general merchandise retailer in the United States, selling products through its physical stores as well as its digital channels. Based in Minneapolis, Minnesota, the company was founded in 1902 as Goodfellow Dry Goods. Target continues to narrow the gap between bricks and mortar retail and online, benefiting from BOPUS, buy online pick up at store.

Danaher Corporation headquartered in Washington, D.C., designs, manufactures and markets healthcare equipment. Its product line includes Life Sciences and Diagnostics tools and products. Danaher is benefitting from the increase in health care testing around COVID-19.

Kansas City Southern is headquartered in Kansas City, Missouri. It is a transportation holding company with railroad investments in the United States, Mexico and Panama. The company's rail network includes about 6,700 route miles (10,783 km) in the U.S. and Mexico. The stock rose in the quarter on takeout rumors. Kansas City Southern is a north-south rail, with material exposure to Mexico. As such, the company should be a primary beneficiary of the USMCA trade agreement. In addition, Kansas City Southern is embracing PSR (Precision Scheduled Railroading) which will cut costs and drive revenue.

Microsoft Corporation develops, licenses and supports a range of software products, services and gaming platforms for computing devices worldwide. The bulk of the attribution from Microsoft in the quarter came from no exposure to the name. The Argent Large Cap team waited until the company's valuation fell to a level that its risk/reward was compelling in order to purchase the stock. Going forward, we expect Microsoft to remain a dominant player in business software. Microsoft's Azure (cloud computing service) grew 50% last quarter, with expectations of mid 30% growth in the future. In addition, its Teams product is taking share in virtual meeting software for businesses.

Top Detractors

Crown Castle International Corp. operates as a real estate investment trust. Crown Castle owns, operates and leases cell towers and other infrastructure for wireless communications. The company was founded in 1994 and is headquartered in Houston, TX. Crown Castle was weak in the quarter, with some concern on the part of investors over the possible delay of the 5G rollout in the United States. Although there may be a slowdown in the rollout given the impact of COVID-19, when the spend comes, Crown Castle with its cellular towers and antennas, will benefit.

Incyte Corporation is a biopharmaceutical firm specializing in oncology drugs. Incyte went public in 1993 and is based in Delaware. For the quarter biotech companies were weak in general.

Abbvie, Inc. is a U.S.-based pharmaceutical company founded in 2013. It originated as a spin-off from Abbott Laboratories. The company discovers, develops, manufactures and sells pharmaceutical products worldwide. For the quarter pharmaceutical companies were weak in general.

Post Holdings, Inc. is a consumer packaged goods company that operates in the United States and internationally. The company was founded in 1897 and is based in St. Louis, Missouri. The company has many recognizable brands such as Grape-Nuts, Weetabix, Bob Evans Farms and Raisin Bran. Although Post's cereal business is doing well, 30% of the company's revenues come from food service. With many restaurants closed, Post's food service segment has been impacted.

Centene Corporation is a major health insurance company, based in St. Louis, Missouri. Centene's main business lines are government health care plans including Medicare, Medicaid, The Health Insurance Marketplace System and Tricare. Centene fell during the quarter as the potential for political issues increased. The repeal of the Affordable Care Act would be a negative for the company, but likely would be replaced by an alternative health care program that should be positive for Centene.

Buys

GoDaddy Inc. designs and develops cloud-based technology products. The company provides domain name registration, website hosting as well as a broad range of marketing tools and services. COVID-19 is accelerating the use of e-commerce as a means for consumers to interact with small to medium-sized businesses, GoDaddy's target market. In September 2019, the company appointed Aman Bhutani as CEO. He is the former president of Expedia and has a solid track record of delivering growth. Bhutani brings a strong focus on growing e-commerce related products and services to GoDaddy. Additionally, GoDaddy is trading at an attractive valuation relative to other online service providers.

LPL Financial Holdings, Inc. was founded in 1968 and is considered the largest independent broker-dealer in the United States. The company offers a platform of proprietary technology, brokerage and investment advisory services to independent financial professionals and financial institutions. LPL made investments in its technology and product offerings which have resulted in strong organic growth. Additionally, LPL's growth outlook remains strong as higher technology and regulatory expenses for smaller financial professionals and institutions enhance the trend of outsourcing back-office capabilities.

Microsoft Corporation was founded in 1975 and headquartered in Redmond, Washington. Microsoft Corporation develops, licenses and supports a range of software products, services and gaming platforms for computing devices worldwide. Microsoft is well-positioned to continue growing as its customers shift their computing from on-site servers to Microsoft's public cloud.

Monster Beverage Corporation is a beverage company that manufactures energy drinks including Monster Energy, Relentless and Burn. In addition to a stable and attractive growth business in the United States, Monster is benefitting from successful expansion into international markets that remains in its early stages. A key to Monster's success over the years has been the company's ability to develop new products and enter new markets. Argent expects international expansion and the company's robust pipeline to drive the next chapter of accelerating growth.

Sells

V.F. Corporation designs, produces, procures, markets and distributes branded lifestyle apparel, footwear and related products worldwide. The company has more than 30 brands, including The North Face, Vans, Red Kap, Williamson Dickie and Timberland. The company was founded in 1899 and is based in Greensboro, North Carolina. With some retail chains shutting their doors and shoppers avoiding apparel, V.F. is experiencing a more difficult operating environment.

Portfolio Positioning

The drumbeat of Growth over Value continued in the third quarter, with the Russell 1000 Growth® outperforming the Russell 1000 Value® by over 750 basis points. In addition to the skew in growth, there continues to be a skew in performance amongst a select few stocks. The following chart shows the concentration of the top five stocks in both the Russell 1000 Growth and the S&P 500 indices. As illustrated in the chart, we have breached Internet Bubble levels in terms of concentration for the Russell 1000 Growth and are moving in that direction for the S&P 500. The contrast in concentration is all the more telling when compared with the Russell 1000 Value, where its striking feature is its lack of concentration.

Concentration at Record Highs

Source: Compustat, Goldman Sachs Global Investment Research

The Argent Large Cap strategy continues its long-held tilt to growth cyclicals. The addition of LPL Financial is indicative of this tilt, as the company is tied to increased wealth generation from mainstream investors. With better economic data, whether through aggressive stimulus on the part of monetary and fiscal authorities, or normalization coming out of the COVID-19 event-driven recession, we believe that economically sensitive growth stocks stand to be primary beneficiaries of that improvement going forward. In addition, many of these companies are trading at depressed valuations relative to the market. The potential for positive operating leverage for growth cyclicals the Large Cap strategy holds stands in contrast to many of the companies that have been leading the market year to date. In addition, the valuation of the growth cyclicals in general is lower than the market as a whole, affording the portfolio downside protection should the recovery be more drawn out.

With regard to the upcoming election, the Argent Large Cap team believes a Democratic sweep would likely bring a large stimulus package, boosting the economy and cyclical stocks. A likely negative would be increased taxes and further regulatory pressure, with particular emphasis on green technology at the expense of hydrocarbons. A Trump victory would lessen the odds for a large stimulus, but would suggest continued relaxation of regulations and low taxes. A potential negative from a Trump victory would be pressure to change or eliminate the Affordable Care Act. In that event, we will watch our health care exposure closely. While there will be unknowns coming out of the ultimate election results, we believe that economic stimulus will be a top of mind consideration for either administration and will be positive for the portfolio tilt.

Sincerely,

Argent Large Cap Team

1. Argent Capital Management, LLC ("Argent") is an independent investment management firm comprised of two distinct business entities: the Non-Wrap Fee/SMA Business of Argent Capital Management, LLC ("Principal Business"), which does not include wrap fee/SMA clients, and the Wrap Fee/SMA Business of Argent Capital Management, LLC ("Wrap Business"), which includes only wrap fee/SMA clients. The Principal Business claims compliance with the Global Investment Performance Standards (GIPS) and has prepared and presented this report in compliance with the GIPS standards. The Principal Business has been independently verified for the period January 1, 2003 through December 31, 2019. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Argent Large Cap Growth Equity Composite has been examined for the periods January 1, 2003 through December 31, 2019. The verification and performance examination reports are available upon request.

2. This composite represents investment performance for portfolios in U.S. equities with strong earnings and growth characteristics and large capitalization, for which Argent has sole investment discretion. Portfolios typically include 30-40 equity holdings; with fixed investments initially less than 5% of total portfolio value, never exceeding 10% and cash targeted to be less than 10% of total portfolio value. This composite was created in October 1998. Composite construction was changed as of July 1, 2010 to include new accounts beginning the first month under management versus after one calendar quarter under management. A complete list and description of composites is available upon request.

3. The benchmark is the Russell 1000 Growth Index which measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. Performance results prior to September 30, 2006 were measured against the S&P 500 Index. The benchmark was changed to be more representative of our composite strategy. We will continue to present S&P 500 Index performance as additional information. Russell Investment Group is the source and owner of the Russell Index data contained or reflected in this material and all trademarks and copyrights related thereto. The presentation may contain confidential information and unauthorized use, disclosure, copying, dissemination or redistribution is strictly prohibited. This is a presentation of Argent. Russell Investment Group is not responsible for the formatting or configuration of this material or for any inaccuracy in Argent's presentation thereof.

4. Valuations are computed and performance reported in U.S. currency. Performance results are total return, (i.e. include the reinvestment of all income). Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future results.

5. Gross performance is presented before management and certain custodial fees, but after all trading expenses except where commissions have been waived or for bundled fee accounts. Net of fee performance is calculated by reducing gross performance by actual management fees incurred and bundled fees for applicable portfolios. The composite includes bundled fee portfolios that pay a fee based on a percentage of assets under management. Bundled fees may include trading costs, portfolio monitoring, consulting services, and custodial services. The composite includes bundled fee accounts which represented less than 1% of composite assets during the periods of 2011 - 2019. During 2019, the composite included portfolios where commissions were waived representing less than 32% of composite assets.

6. Argent's annual advisory fees are calculated as a percentage of assets under management according to the following schedule: 1% on the first \$1M, 80% on the next \$2M, 65% on the balance thereafter, although fees may be negotiated or waived in certain circumstances. The composite includes non-fee paying accounts which represented less than 1% of composite assets during the periods of 2010 - 2019.

7. Internal dispersion is calculated using the asset-weighted standard deviation of all portfolios that were included in the composite for an entire year, net of fees.

8. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period.
