5. Gross performance is presented before management and certain custodial fees, but after all trading expenses except where commissions have been waived or for bundled fee accounts. The composite includes bundled fee portfolios that pay a fee based on a percentage of assets under management. Bundled fees may include trading costs, portfolio monitoring, consulting services, and custodial services. The composite included bundled fee accounts which represented less than 1% of composite assets during the periods of 2011 – 2019. Non-fee-paying accounts are reduced by a model fee derived by applying the standard fee schedule in effect for the respective period.

7. Internal dispersion is calculated using the asset-weighted standard deviation of all portfolios that were included in the composite for an entire year, net of fees. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The external deviation is based on the 36-month gross-of-fees returns of the composite and the benchmark.
